Driver Fatigue Management Solutions (DFMS)

**Safe
Journey
Matters**

B E N E F I T S

Enhanced Road Safety: Fatigue detection technology such as IN Cab Alert, Vibrator Cushion to identify and monitor driver behavior in real-time.

Improved Driver Performance: With reduced fatigue-related incidents, drivers can maintain optimal performance levels, ensuring peak productivity.

Seamless Integration: Easily integrated with GPS Devices, Network Video Recorders where DFM footage is captured. Capability to connect with up to 5 numbers of additional cameras for Live Video Monitoring. Incident Alerts go directly to End –User via sms/email.

Real Time Alerts & Reports: Proactively addresses issues. Enhances efficiency.

Compliance: eTrans DFM Solutions are designed to comply with all regulatory safety standards. Also facilitates faster and smooth insurance settlement claims.

Cost Saving: Reduces fatigue-related risks such as accidents, insurance claims, hence saves cost.
